

J1 supplies switched 3.3 V and ground from main J3; connect matching pin numbers.

J2 is the LCD pin landing, not a separate header. Verify front-view pin 1.

A/K backlight contacts remain insulated and unconnected.

R3: all passive parts are SMD. C5 is ceramic/nonpolar, not an electrolytic.

Use owned 0603 kits only after rating, dielectric and value qualification.

Prototype: firmware and physical assembly tests pending. See PCB_REVIEW.md.

Power pins on source connectors describe external supplies; Q1 collector is switched power output.

Prototype — FABRICATION HOLD
